

## OUTLINE

The **LMD-1410SC** is the latest LCD monitor from Sony designed to meet the critical requirements of security video monitoring. This monitor, offering superb picture quality and excellent performance, has been optimised to replace the Sony SSM-14L1 video monitor. Combining a slim and space-saving design with outstanding picture reproduction, this new LCD monitor is the ideal choice for your security monitoring applications.

## FEATURES

### ◆ High Picture Quality

Incorporating a VGA-type LCD panel with 640 x 480 pixel resolution, this monitor reproduces precise and detailed images from a variety of video signals, including composite and Y/C. In addition, by using a wide aperture LCD panel, this monitor provides high brightness and high contrast images.

### ◆ Wide Viewing Angle

The LCD panel offers a wide viewing angle of 170 degrees, both vertically and horizontally, with minimal reduction in picture contrast. This allows images to be viewed from various positions and angles.

### ◆ Input Versatility

Equipped with three selectable video inputs, including analogue composite, Y/C (S-Video) and RGB/component, the LMD-1410SC can accept signals from a number of cameras and recorders.

### ◆ Monaural Audio Monitoring

This monitor is equipped with a speaker, enabling the user to monitor audio.

### ◆ Convenient Installation

The LMD-1410SC can be mounted in a 19-inch EIA standard rack using an optional mounting bracket. Because it complies with VESA standards, it can also easily be mounted (100 x 100 mm pitch) on a wall or a ceiling.

### ◆ Slim and Light

Thanks to a thin and lightweight design, this monitor is ideal for installations where space is limited.

### ◆ Protected Controls

The key-inhibit function helps prevent inadvertent operations from the control panel.

### ◆ Colour Temperature/Gamma Selection

High/low colour temperatures or user preset can be selected.

### ◆ Remote Control via Parallell/F

### ◆ 4:3/16:9 Switchable Aspect Ratio
